Breakstem Systems Performance Fasteners For Versatile Assembly

Breakstem fasteners

Joining components and diverse materials that vary in thickness and composition is a fundamental aspect of our breakstem fastening systems. The flexibility to meet a wide range of customer requirements ensures that an optimal fastening solution can be tailored to the needs of the application.

Breakstem fasteners are produced from high quality, durable materials manufactured using the cold forming process. Elements of the fastener design, cold forming process and additional operations produce each fastener's specific performance features and characteristics.

Installation

POP Avdel breakstem fasteners conform to the requirements of modern installation systems. They can be installed manually or automatically and can easily be integrated into existing installation processes. Breakstem fastening solutions can be used to simplify production flow and reduce assembly time while simultaneously improving quality and performance in the application. Whether you specialize in high volume production or small volume batches, we can recommend a fastening solution to match. Customised Multi-head Assembly Stations from POP Avdel can fasten any number of joints in a single operation while our hand tools provide flexible assembly solutions in many environments.

Applications

The wide range of breakstem fasteners can be used to fasten a variety of materials including soft, brittle and thin metals and plastics. They are designed to meet the highest quality standards and built to resist the toughest environmental extremities.

POP Avdel products have often been designed and developed in collaboration with our customers, assuring they've been designed with function and practicality at the forefront of the development.

Mission

To ensure reliable joint design nothing should be left to chance. From material selection to fastener design and installation tooling, every decision impacts the quality, reliability and cost of the final product. STANLEY Engineered Fastening provides highly skilled applications engineering services to ensure First Time Right Design™ and optimised joints. In partnership, our teams can recommend the best solution from the broadest product portfolio in the industry, optimising performance at the lowest possible cost for your specific application needs.

Breakstem Systems

POP Avdel breakstem fasteners and installation tools are a high performance blind fastening system. For more than 100 years the POP and Avdel brands have been synonymous with world-leading, blind fastening systems. Used in all manufacturing industries throughout the world, there is a breakstem fastener and installation tool to suit virtually every assembly requirement. Key user benefits include:

Benefits of assembly

Extensive Product Choice

The breakstem range is now more extensive than ever. A wide choice of head styles, finishes and sizes are available as standard and new products have been introduced to expand the steel and stainless steel product ranges.

Installation Tools

A comprehensive range of high performance tools ensure reliable and accurate installation of our breakstem fasteners. Combining the latest design and engineering technology with robust and durable construction, the range includes hydro-pneumatic handtools, battery powered tools as well as fully automated, customised equipment for high volume production.

Multi-grip Capability

Stavex®, Avex®, Avibulb® XT, Avinox® XT, Vgrip®, Monobolt® and Klamp-Tite® breakstem fasteners offer multi-grip capability. By accommodating many variations in material thickness, just one fastener can be used in several assembly applications, reducing stock holding, time and costs.

Complete Hole Fill

Monobolt®, Stavex® and Avex® fasteners offer exceptional hole fill. Expanding to fill oversize, irregular, slotted or misaligned holes they create a high strength, vibration resistant joint.

Consistent, High Performance

Designed and manufactured to tight tolerances, POP Avdel breakstem fastening systems ensure consistently accurate and secure, high strength assembly.

Retained and Locked Stems

Most breakstem fasteners have a retained stem which provides strong, vibration resistant joints without electrical problems or rattling often caused by loose stems. For additional strength, Monobolt®, Interlock® and Klamp-Tite® stems are mechanically locked into the shell head while the splined stems of Hemlok® fasteners form interference locks.

Structural Assembly

Where load-bearing, structural joints are required, Avibulb® XT, Avinox® XT, Hemlok®, Interlock® and Monobolt® breakstem fasteners have been designed to offer high shear and tensile strength.

Customised Designs

As you would expect from a leader in fastening solutions, STANLEY Engineered Fastening has extensive experience in engineering and developing breakstem fasteners and tooling to unique customer requirements with many examples detailed in this catalog. Please contact us to discuss your special requirements.

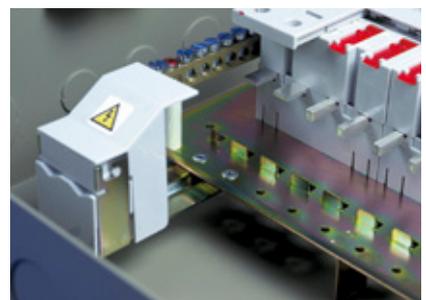

Domestic appliances

Car chassis

Electronic components

Selecting a Breakstem Fastener

Selecting a breakstem fastener is a simple process. The factors detailed below are designed to help you select a fastener suitable for your application:

Fastener Selection

Grip Range

The fastener should be selected to ensure that the thickness of the parent material(s) falls within the grip range. Most of our breakstem fasteners offer multi-grip capability, with Monobolt®, Stavex®, Vgrip®, and Avex® fasteners offering exceptional multi-grip performance.

Hole Size

This is specified on the relevant technical data sheet for the fastener. It is important to control the hole size accurately in order to ensure optimum fastener performance.

Hole Fill

Monobolt® and Interlock® fasteners provide excellent hole fill via a radially expanded body. Avex®, Stavex®, and Avibulb® fasteners also provide good hole fill.

Fully Sealed Fastening

Closed End Rivets should be specified for all of the many applications where a fully sealed fastening is essential. This rivet design produces a seal that prevents passage of liquid or vapor at pressures up to 6.9 bar.

Strength Characteristics

Hemlok®, Monobolt®, Klamp-Tite®, Stavex®, Vgrip®, Avinox® XT and Avibulb® XT fasteners all offer high shear and tensile strength. Please refer to the technical data sheets for typical strength values. For heavy duty applications, the Avbolt® blind structural fastener is the first choice. Details on Avbolt® can be found on our website or in the Lockbolt Systems catalog.

Load Spreading

Most of our breakstem fasteners have a large blind side bearing area. LSR and Klamp-Tite® fasteners provide exceptional load spreading capability and are ideal for use in thin sheet or low strength materials.

Corrosion Resistance

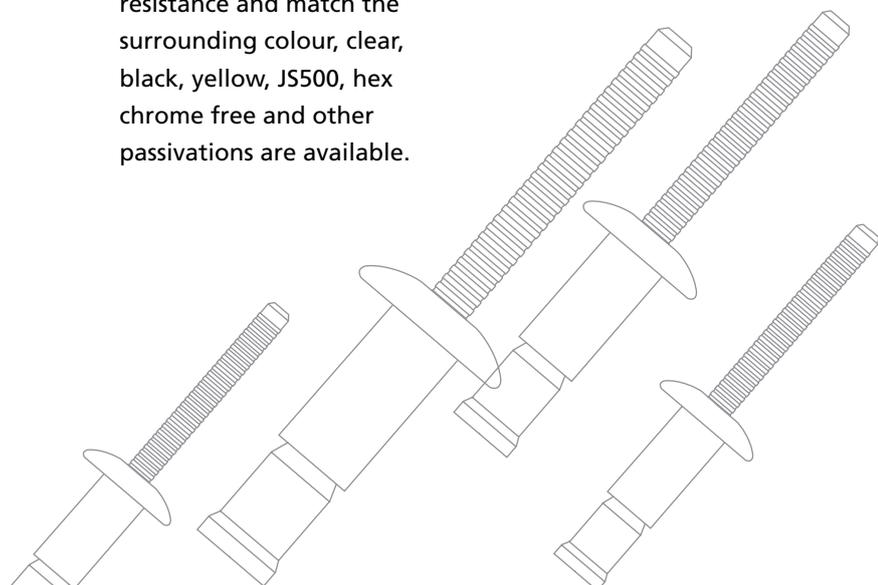

The selection of the material type and finish of the breakstem fastener should be made on the basis of the corrosion resistance required. Corrosion is best reduced by selecting a fastener material which is the same as the parent material(s). Stainless steel fasteners offer the best corrosion resistance.

Special Surface Coatings

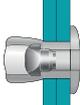

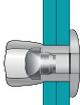

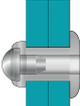

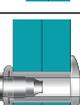

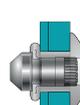

For improved corrosion resistance we can apply many protective coatings, including: Delta-Seal®, extra zinc plating, zinc-nickel plating and anodised finishes for aluminium alloy fasteners, with or without dyeing. Where it is important to improve corrosion resistance and match the surrounding colour, clear, black, yellow, J5500, hex chrome free and other passivations are available.

Important Information

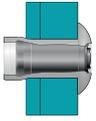

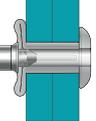

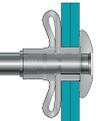

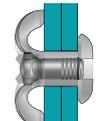

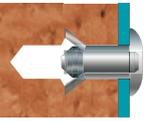

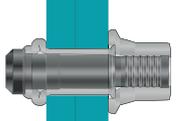

The information on this page should be used in conjunction with the technical data sheets for the individual fasteners. All test and performance data detailed on the datasheets reflect the ultimate strength of the fasteners, determined with representative samples and over multiple tests. We recommend that you use this data as a guide only, since other factors may affect the performance of the fastener. We strongly recommend you test the fastener in your application to determine exact performance levels.

Open End Rivets

Non-structural blind breakstem rivet designed for a wide range of applications. Available in a variety of materials and combinations.

Key features and benefits

- Cost effective standard rivet
- Installed quickly and easily
- Design of the stem head ensures positive retention after installation

Specifications

Sizes:

2.4 mm – 6.4 mm
(3/32" – 1/4")

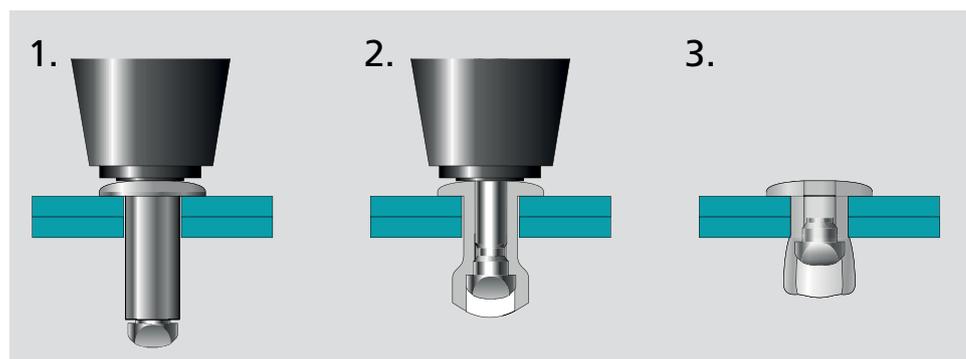

Materials:

Aluminium, Steel,
Stainless Steel, Copper,
Nickel Copper Alloy

Head Styles:

Dome, Large Flange,
Countersunk

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- White goods
- Automotive
- Building & construction
- Furniture
- Lighting
- Hearth, grill
- Patio furniture
- Renewable energies

Automotive

White goods

Snowmobile trailer

Lighting equipment

Conference room furnishings

Gutter

Soft Set Rivets

Almost identical in appearance as the open end, this rivet is engineered with a soft aluminium alloy body and mandrel preventing installation fractures on brittle materials.

Key features and benefits

- Designed for soft or brittle materials
- Incorporates a special Aluminium alloy
- Low clamping force

Specifications

Sizes:

2.5 mm – 4.0 mm (5/32")

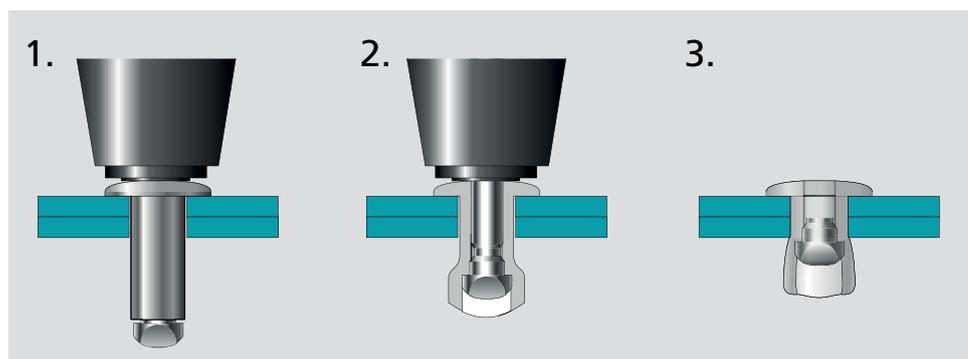

Materials:

Aluminium

Head Styles:

Dome

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Office furniture
- Mobile homes, caravans
- Public transportation
- Plastic components
- Electrical engineering
- Lighting

Conference room furnishings

Plastic school chair

Recreational vehicle

Plastic valve

Angle section to PCB

Playground equipment

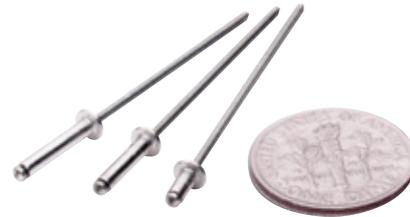

Micro Rivets

2 mm aluminium open end rivet designed for small micro-electronic applications.

Key features and benefits

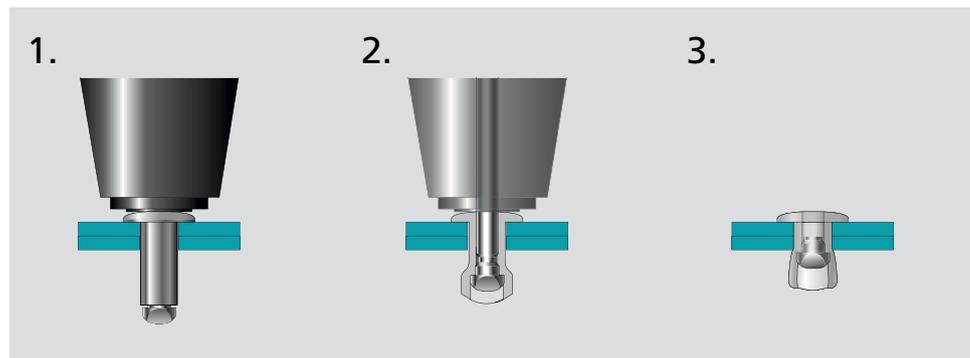

- Smallest blind rivet available
- Suitable for tight places
- Accommodates very small holes
- Requires access to primary side only
- Very low secondary side clearance
- Low head height
- Soft set body will not damage work piece
- Ideal for thin metal and printed circuit boards

Specifications

Size:
2.0 mm
Material:
Aluminium
Head Style:
Dome

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Electronic devices
- Telecommunications
- Vehicle electronics
- Entertainment systems

Electronics applications

Computer and mobile devices

Car entertainment

Automotive electronics

Pull-Thru (PT) Rivets

Unique double countersunk steel blind rivet provides a flush setting surface on both sides of the application.

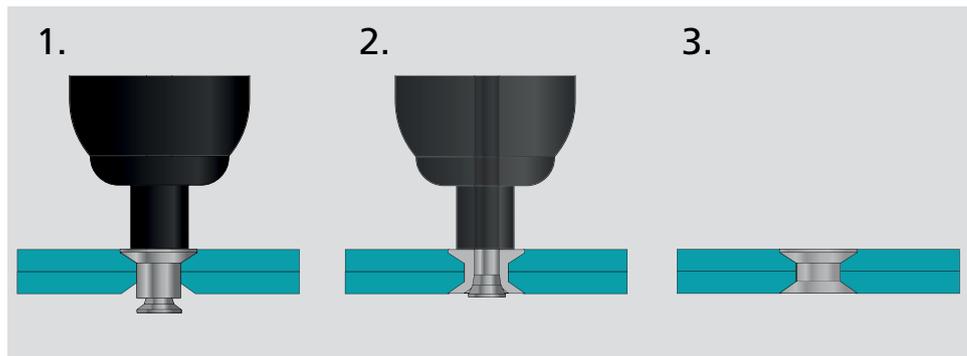

Key features and benefits

- Flush Set on both sides of the application on countersunk materials*
 - Insertion can be reversed improving rivet tool access
 - Unique "Pull-Thru" mandrel
 - No loose mandrel heads remain anywhere in the application
 - Mandrel head never breaks away from the mandrel
 - Consistent clamp force
 - Tight radial set provides increased structural rigidity
 - Colored mandrels for quick visual identification of different part sizes
 - High speed automation with POP Rivet Presenter facilitates a cycle time as fast as 2 seconds
- * Rear sheet tail protrusion of installed fastener up to 0.4 mm is permissible

Specifications

Size:
3.0 mm
Material:
Steel
Head Style:
Countersunk

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

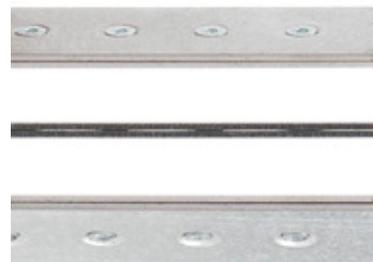

Assembly applications

- Electronic enclosures
- Computer servers
- Lighting

Server blade assembly

Flush setting surface on both sides of the application

Closed End Rivets

Exclusive rivet design featuring a cup shaped end configuration ideal for applications that need to be water tight or when stem retention is paramount.

Key features and benefits

- Seals out moisture, air and other contaminants
- Higher tensile and shear strength than the equivalent open end rivet
- 100% stem retention

Specifications

Sizes:

3.2 mm – 6.4 mm
(1/8" – 1/4")

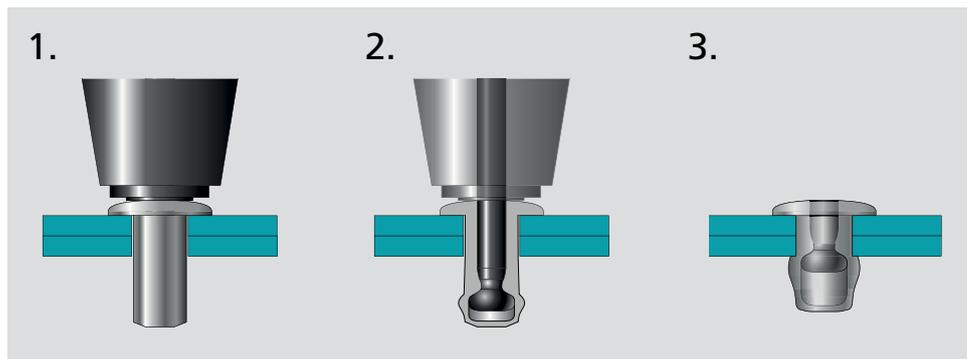

Materials:

Aluminium, Steel,
Stainless Steel, Nickel-
Copper Alloy

Head Styles:

Dome, Countersunk

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- White goods
- Electronic enclosure
- Signs
- Outdoor cases
- Scoreboards
- LED signs
- Recreational vehicles

White goods

Lawn and garden

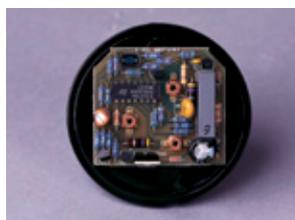

School bus

Electronic enclosure

Electronic switch

Sunroof

Multi-grip, aluminium alloy breakstem fasteners with a long and reliable track record in a wide range of applications and industries.

Key features and benefits

- Multi-grip capability accommodates wide variations in material thickness
- One fastener can be used to replace several standard grip fasteners thus reduced fastener inventory and simpler stock control
- Good hole fill provides strong, vibration resistant joints
- Compensates for irregular, oversized, slotted or misaligned holes
- Can stop sheet movement in non-standard holes
- Retained stem avoids damage, electrical problems or rattling caused by loose stems
- Provides a large blind side bearing area against the rear sheet
- Spreads the tail bearing load/clamp load on the rear sheet making it ideal for use in thin sheet materials

Specifications

Sizes:

3.0 mm to 6.4 mm (1/4")

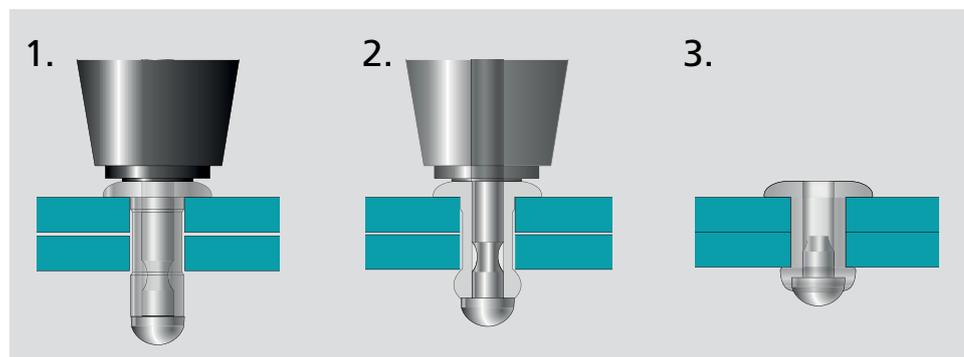

Materials:

Aluminium

Head Styles:

Dome, Large Flange,
Countersunk

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive
- Commercial vehicles
- Domestic appliances
- Electronics
- Electrical equipment
- General light industrial
- Heating and ventilation

Garage doors

Domestic heating systems

Car chassis

Stavex®

Multi-grip, high strength steel and stainless steel breakstem fasteners.

Key features and benefits

- High shear and tensile strength provides strong, vibration resistant joints
- Stainless steel option provides high corrosion resistance and is ideal for applications requiring elevated temperatures
- Multi-grip capability accommodates wide variations in material thickness
- One fastener can be used to replace several standard grip fasteners thus reduced fastener inventory and simpler stock control
- Good hole fill compensates for irregular, oversized, slotted or misaligned holes and can stop movement in non-standard holes
- Retained stem avoids damage, electrical problems or rattling caused by loose stems
- Provides a large blind side bearing area against the rear sheet
- Spreads the tail bearing load/clamp load on the rear sheet making it ideal for use in thin sheet materials

Specifications

Sizes:

3.2 mm – 6.4 mm
(1/8" – 1/4")

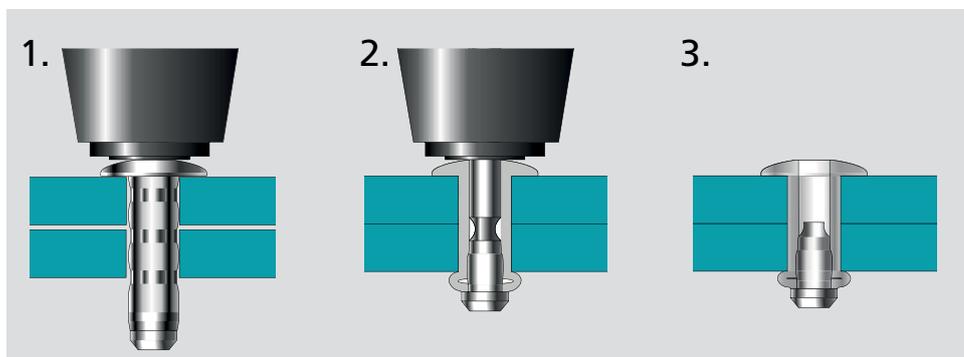

Materials:

Steel, Stainless Steel

Head Styles:

Dome, Large Flange,
Countersunk

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive
- Commercial vehicles
- Domestic appliances
- Electronics
- Electrical equipment
- General light industrial
- Heating and ventilation

Snowmobile

Passenger air bag

Roll-up security door

Vgrip®

High performance, multi-grip rivet with excellent claim properties and a wide blind side spread. Also features a positively retained stem head and a grooved stem for optimum tool jaw life.

Key features and benefits

- Multi-grip capability (covers 4.0mm) enabling SKU reduction and improved stock management
- Single bulb setting in all grip thicknesses gives superior aesthetic finish and evenly distributes contact pressure over the application
- Provides a large blind side bearing area for increased tensile strength
- Moderate hole fill therefore, avoiding pressure on holes
- Locked stem eliminates rattle or any risk of head ejection
- Special "Soft Set", "HS" (High Strength), "ZRE" (Zero Radial Expansion) and "ZRS" (Zero Radial Sliding) versions available on request

Specifications

Sizes:

4.8 mm (3/16")

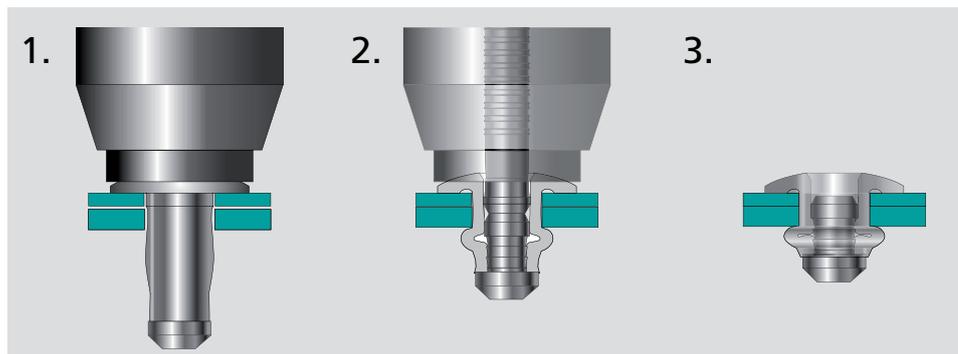

Materials:

Aluminium, Steel

Head Styles:

Dome, Large flange

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive components
- White goods
- General industrial
- Renewable energies

Automotive

Solar panels

Ladders

White goods

Automotive car seat

Bumper

Avibulb® & Avinox®

High strength steel (Avibulb®) and stainless steel (Avinox®) breakstem fasteners with excellent bulbing tail formation. Ideal for thin sheet materials.

Key features and benefits

- High shear and tensile strength providing strong, vibration resistant joints
- Stainless steel Avinox® for high corrosion resistance and applications requiring elevated temperatures
- Provides a large blind side bearing area against the rear sheet
- Spreads the tail bearing load/clamp load on the rear sheet making it ideal for use in thin sheet materials
- Good hole fill compensates for irregular, oversized, slotted or misaligned holes
- Retained stem avoids damage, electrical problems or rattling caused by loose stems

Specifications

Sizes:

3.2 mm – 4.8 mm

(1/8" – 3/16"),

Avibulb® up to 6.0 mm

Materials:

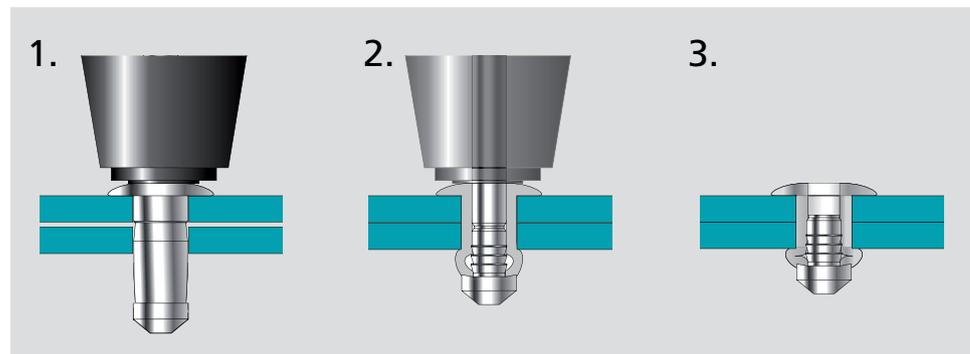

Steel, Stainless Steel,

A4 Stainless Steel

Head Style:

Dome

Typical placing sequence

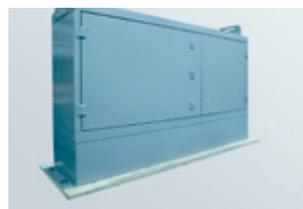

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive
- Cabinets and enclosures
- Heating and ventilation
- Telecommunications
- General light industrial

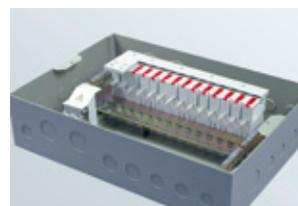

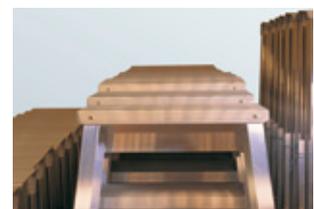

Telecommunications cabinets

Electronic components

Ladders

Avibulb[®] XT y Avinox[®] XT

Avibulb[®] XT (steel) and Avinox[®] XT (stainless steel) are high performance structural breakstem fasteners with excellent bulbing tail formation, ideal for thin sheet materials. The new fasteners feature a wide grip range, especially suited for applications with varying sheet thicknesses.

Key features and benefits

- High shear and tensile strength and high residual clamp load providing strong, vibration resistant joints
- Multi-grip capability accommodates wide variations in material thickness
- Spreads the tail bearing load/clamp load on the rear sheet making it ideal for use in thin sheet materials
- Suitable also in softer materials
- Retained stem avoids damage, electrical problems or rattling caused by loose stems
- Underhead recess accommodates burrs around holes and spreads the load evenly on the top sheet
- Stainless steel Avinox[®] XT for high corrosion resistance and applications requiring elevated temperatures

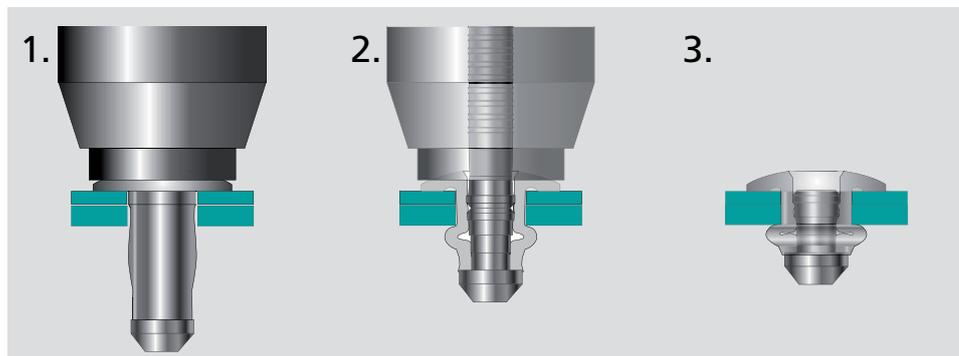

Specifications

Sizes:
6.4 mm (1/4")

Materials:
Steel, Stainless Steel

Head Style:
Dome

Typical placing sequence

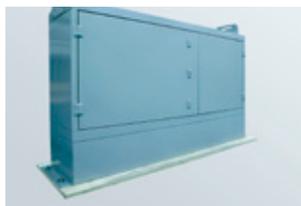

Avdel Patent Protected

Please visit our website for fastener placing animations and technical data.

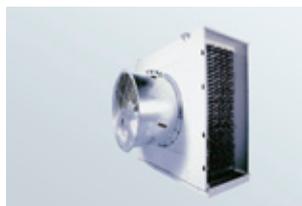

Assembly applications

- Automotive
- Truck and trailer
- Cabinets and enclosures
- Heating and ventilation
- Telecommunications
- Domestic appliances
- Renewable energies
- Industrial equipment

Telecommunications cabinets

Industrial refrigeration

Vehicle panels

Solar panels

Washing machine

Heating and ventilation

Hemlok®

Structural breakstem fasteners with exceptional shear and tensile strength and a large blind side bearing area against the rear sheet.

Key features and benefits

- All steel version provides exceptional shear and tensile strength
- Large blind side bearing area spreads the tail bearing load/clamp load on the rear sheet reducing creep e.g. in plastic material
- Interference lock formed by a splined stem provides strong, vibration resistant joints
- No damage, electrical problems or rattling caused by loose stems

Specifications Typical placing sequence

Sizes:

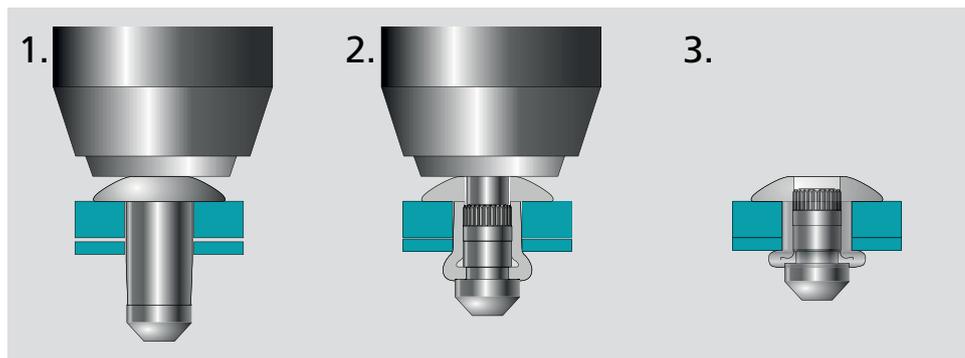

6.4 mm (1/4")

Materials:

Aluminium, Steel

Head Style:

Protruding

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive
- Warehouse racking
- Ladders

Scaffold tower

Step ladder

Car seat base

Vehicle mud flaps

Monobolt®

Multi-grip structural breakstem fasteners providing a fully sealed joint and visible lock.

Key features and benefits

- Excellent hole fill via radially expanded body provides very strong, vibration resistant joints and compensates for irregular, oversized, slotted or misaligned holes
- Good sheet take-up performance for large gap closing capability
- Stem mechanically locked into body avoids damage, electrical problems or rattling caused by loose stems
- Multi-grip capability
- High shear and tensile strength
- Visible lock for quick and easy inspection

Specifications

Sizes:

4.8 mm, 6.4 mm and 10 mm
(3/16", 1/4" and 3/8")

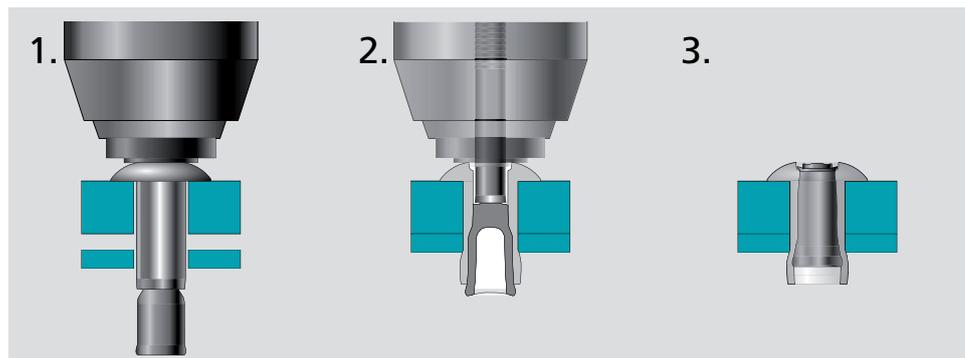

Materials:

Aluminium, Steel,
Stainless Steel,
A4 Stainless Steel

Head Styles:

Protruding, Countersunk

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive
- Cabinets and enclosures
- Commercial vehicles
- Domestic appliances
- Heating and ventilation

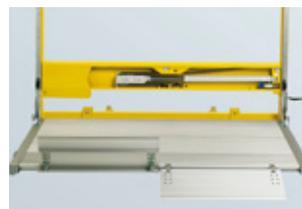

Car chassis

Column tail lifts

Product cooler

Interlock[®]

Multi-grip structural breakstem fasteners providing a fully sealed joint.

Key features and benefits

- Excellent hole fill via radially expanded body provides greater joint integrity, added water resistance and compensates for irregular, oversized, slotted or misaligned holes
- Can stop sheet movement in non-standard holes
- Good sheet take-up performance for large gap closing capability
- Stem mechanically locked into body avoids damage, electrical problems or rattling caused by loose stems
- Multi-grip capability accommodates wide variations in material thickness
- High shear and tensile strength requires fewer rivets per assembly

Specifications Typical placing sequence

Sizes:

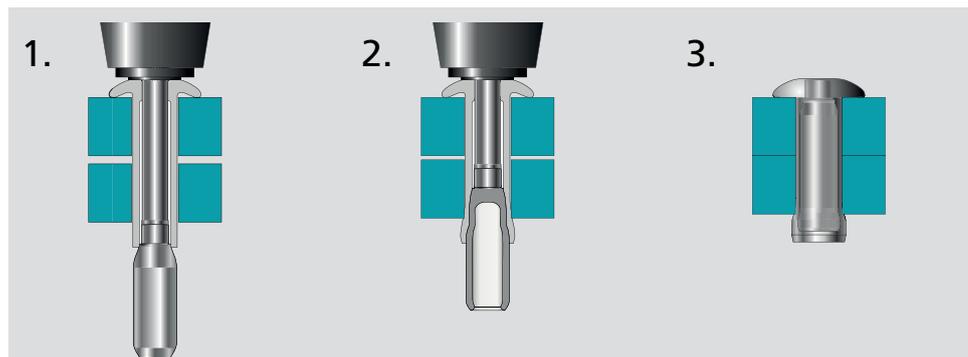

4.8 mm, 6.4 mm and 10 mm
(3/16", 1/4" and 3/8")

Materials:

Aluminium, Steel

Head Styles:

Protruding, Countersunk

- Commercial vehicles
- Domestic appliances
- Heating and ventilation

Truck trailer

Heat exchanger

LSR / Bulbex[®]

Aluminium alloy breakstem fasteners with a split tail formation providing a very large blind side bearing area against the rear sheet. Ideal for use with plastic and low strength material.

Key features and benefits

- Split tail formation provides a very large blind side bearing area against the rear sheet
- Spreads the tail bearing load/clamp load on the rear sheet providing high resistance to pull-out loads
- Multi-grip capability accommodates wide variations in material thickness
- Retained stem avoids damage, electrical problems or rattling caused by loose stems

Specifications

Sizes:

3.2 mm, 4.0 mm and
4.8 mm

(1/8", 5/32" and 3/16")

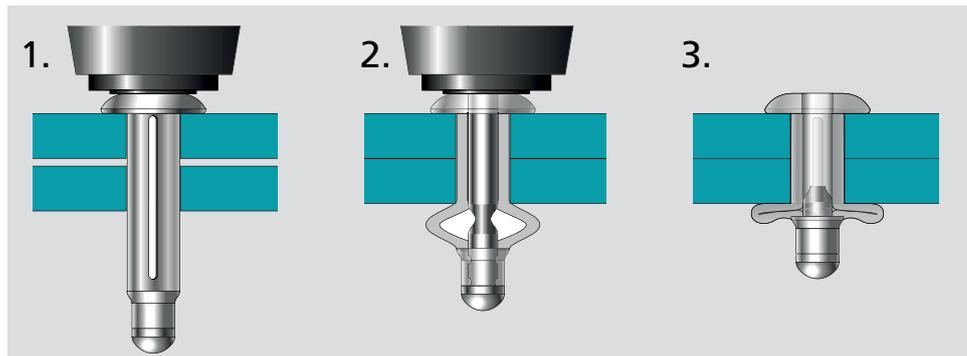

Material:

Aluminium

Head Styles:

Dome, Large Flange

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive
- Caravans/RV
- Mobile homes
- Domestic appliances
- Plastic components

Caravans/RV

Mobile homes

Speaker systems

Klump-Tite®

Aluminium alloy fasteners with a very large blind side bearing area against the rear sheet. Ideal for use in thin sheet or low strength materials.

Key features and benefits

- Split tail formation spreads the tail bearing load/ clamp load on the rear sheet
- Ideal for use in thin sheet materials offering high resistance to pull-out loads
- Multi-grip capability accommodates wide variations in material thickness
- Stem is mechanically locked into body providing very strong, vibration resistant joints
- Visible lock for quick and easy inspection
- Optional underhead washer provides a weather-proof seal

Specifications Typical placing sequence

Sizes:

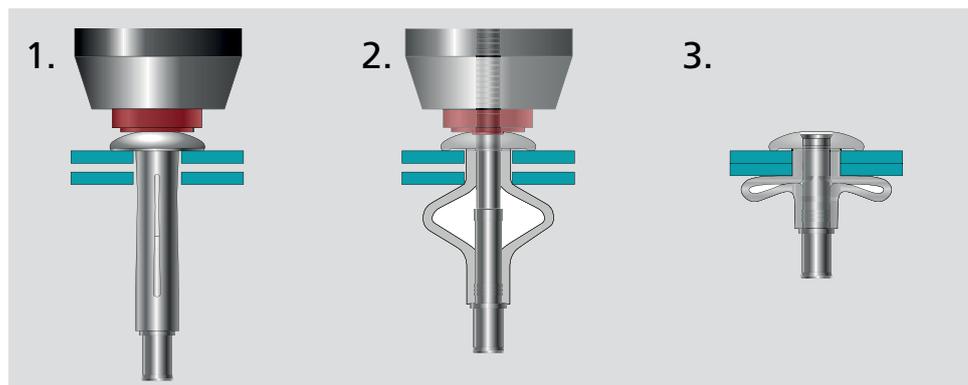

4.8 mm and 6.4 mm
(3/16" and 1/4")

Material:

Aluminium

Head Style:

Protruding

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Container
- Cladding
- Commercial vehicles

Refrigerated truck

Refrigerated truck

T Rivet

Peel-type structural breakstem rivet providing good vibration resistance and shear and tensile strength.

Key features and benefits

- High clamp-up where there is sheet separation
- Visible lock - T Rivet can withstand severe vibration without loss of the stem's plug section
- Multi-grip version available

Peel-type closing head of a T Rivet

Specifications

Sizes:

4.8 mm – 6.4 mm
(3/16" – 1/4")

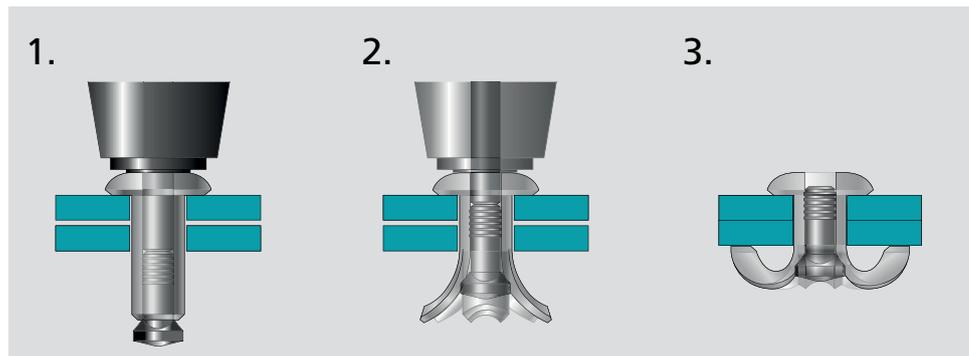

Material:

Aluminium

Head Styles:

Dome/Protruding, Large Flange, Countersunk

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Automotive
- Cabinets and enclosures
- Commercial vehicles
- Heating and ventilation
- Car door
- Honeycomb materials
- Car chassis

Commercial vehicles

Heating and ventilation

Automotive seat back

T-Lok[®]

Cost-effective and efficient method of attaching metal to wood or other soft material without through holes.

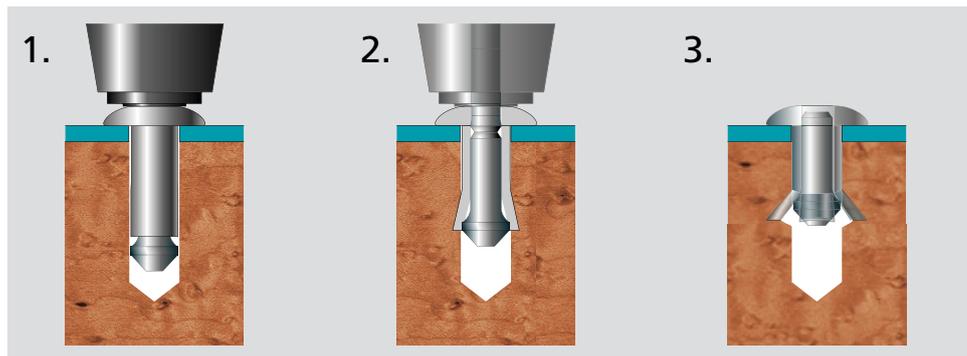

Key features and benefits

- 'Peel-type' tail formation makes it ideal for joining metal to wood, board or low density plastic
- Large bearing surface expands into blind hole providing superior pull-out force
- Ideal replacement for wood screws or self-tapping screws
- Multi-grip capability accommodates wide variations in material thickness

Specifications

Sizes:
4.3 mm and 4.8 mm (3/16")
Material:
Steel
Head Style:
Dome

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Assembly applications

- Garage doors
- Furniture

Garage doors

Furnitures

Speciality Breakstem Fasteners

Peel Rivet

The Peel rivet is designed so that the body peels into "petals" to fasten the application pieces together. This peeling process allows minimum force to be applied during the setting process, thereby protecting the work piece material.

- Ideal for joining softer and more brittle materials such as plastics, rubber, wood, GFPR or laminates
- Material: Aluminium
- Sizes: 3.2 mm - 4.8 mm
- Head Style: Dome

Blindside set view

Avex® Splined

Designed with steel splines for electrical continuity in earthing applications.

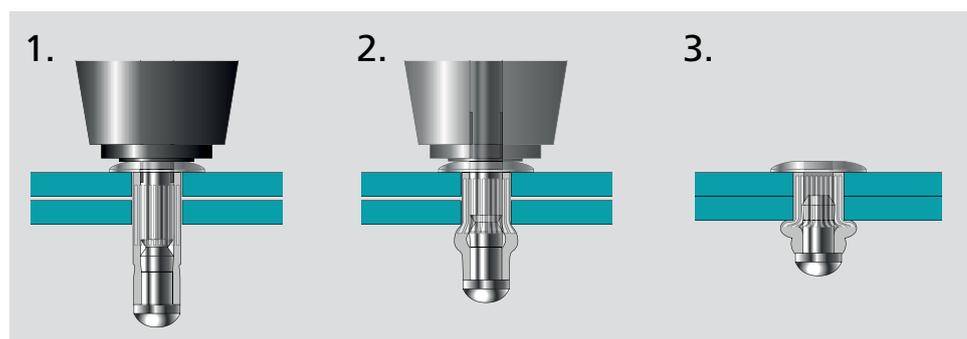

- Steel splines break through a coating thickness of up to 0.3 mm
- Multi-grip capability
- Good hole fill for a strong and vibration resistant joint
- Retained stem – no damage, electrical problems or rattling caused by loose stems

Specifications

Sizes:
4.0 mm – 4.8 mm
(5/32" – 3/16")
Material:
Steel
Head Style:
Dome

Typical placing sequence

Please visit our website for fastener placing animations and technical data.

Speciality Breakstem Fasteners

Earth Tab Rivet

Cost effective earthing point for thin sheet metal, with paint piercing capability to ensure good electrical conductivity.

- Twin tabs allow one or two connections
- Fast installation of a one piece assembly
- Works on a single phase power supply of 240 volts or below
- Provides a resistance to or below 0.1 ohms
- Tested and approved to EN 60335-1 and BS 3456 Parts 201, clauses 27, 28, 31
- For 5.2 mm holes and a material thickness of 1.0 – 1.5 mm
- Steel body and stem with brass tab

Terminal Tag

Copper body rivet and brass tag assembly for electrical conductivity.

- Splines on body to aid efficient earthing connection in pre-painted sheets
- For 5.2 mm holes and a material thickness of up to 2.0 mm
- Range of single or multiple tag assemblies available

Customised Designs

As you would expect from a leader in fastening solutions, we can design and manufacture breakstem rivets with a wide variety of forms and finishes to meet your unique assembly requirements. Shown below are just a few examples of our customised capabilities. Whether you require custom fastener geometry, a particular finish, different fastener material, limited access placing tooling, or anything else we don't offer as standard, please contact us to discuss your special requirements.

Avinox® Breakstem Fastener - Special Body Design

- Special underhead shoulder for automotive application for fixation inclusive compensation of different heat expansion of metal and plastic materials
- Stainless steel material resists corrosion by road salts

Hemlok® Structural Breakstem Fastener - Blue Delta Seal® Coating

- Steel, Delta Seal® blue
- High performance coating & blue colour for identification

Stavex® - Dedicated Grip Range

- Stainless Steel
- Dedicated grip range and very short stem to suit a customer's restricted access application

Stavex® Breakstem Fastener - RoHS Compliant Zinc & Black Finish

- Steel, Zinc & black finish
- Complies with RoHS standards & normally used in automotive interiors

Monobolt® Structural Breakstem Fastener - Grade 316 Stainless Steel

- Grade 316 / A4 Stainless Steel (see Monobolt 2717 series data sheet)
- High corrosion resistant grade rivet

Monobolt® Structural Breakstem Fastener - Cone Stem

- Steel
- Cone stem for easy hole access, for automated installation

Open End Cap Rivets

- Aluminium
- Pre-assembled rivet with plastic cap
- For waterproof applications

Open End Painted Rivets

- Aluminium or Steel
- Match the rivet color to your specific color application

Installation Tool Selection Guide

This table is designed as a guide to help you select the most suitable tool for your particular breakstem rivet. Full technical data can also be found on our website or contact your STANLEY Engineered Fastening representative.

¹⁾ Complete tool comprises of base tool, nose assembly and nose tip(s)
²⁾ Recommended for rivet diameters 4.8 mm (3/16") and greater
³⁾ Type 7287 is a base tool, nose equipment needs to be ordered separately

● Placing capability complete tool
○ Requires additional nose assembly/nose tip
* All standard product can be placed with the PB3400.
Any product highlighted with * in the above table, may have specials where the mandrel length exceeds 55mm.
These cannot be placed with this tool

Hand Tools

Battery Tools

ProSet® PB2500 & ProSet® PB3400

High speed cordless power tools with great strength and endurance

Lightweight and powerful tools with excellent ergonomics, great strength and great added features. Ensures high productivity and improves your return on investment with very low installation cost.

- **Durable** brushless motor that requires minimal maintenance
- **Long lasting** battery capable of placing an average of 1,200 ø4.8 mm standard blind rivets (PB2500, 2.0Ah) respectively 1,000 ø6,4 mm structural blind rivets (PB3400, 4.0Ah) per charge
- **Time saving** continuous operation in production environments without "tool overload"
- **Easy to use:**
 - Tool free, quick release nose housing and jaw guide removal and installation
 - All nose pieces for the POP Avdel rivets range include a rivet holding mechanism to allow the use of the tool in any direction - even upside down
 - Quick slide battery installation; Push button for easy removal of the battery from the tool
- **Warranty Europe:** 2 years in total (1 year & 1 year extension with online registration)

Rivet holding mechanism

Integral mandrel collector

Easy nose housing removal

Robust tool case for outdoor installation

PB3400 with quick release removable mandrel collector

Specifications ProSet® PB2500

Dimensions L x H	320 mm x 240 mm
Battery	DEWALT 18V Li-Ion 2.0Ah
Charger	DEWALT DCB115, with progress lamp display, 30 min. charge time (2.0 Ah)
Stroke	25 mm
Pulling force	8,500 N
Noise level	74 dB(A)
Capacity	Standard rivets ø 2.4 - 4.8 mm
Weight	1.69 kg including battery

Specifications ProSet® PB3400

Dimensions L x H	336 mm x 255 mm (2.0 Ah) 336 mm x 275 mm (4.0 Ah)
Battery	DEWALT 18V XR Li-Ion 2.0Ah or DEWALT 18V XR Li-Ion 4.0Ah
Charger	DEWALT DCB115, with progress lamp display, 30 min. charge time (2.0 Ah)
Stroke	30 mm
Pulling force	18,000 N
Noise level	77 dB(A)
Capacity	Blind rivets ø 4.8 - 6.4 mm
Weight	2.10 kg including 2.0 Ah battery 2.42 kg including 4.0 Ah battery

Power Tools

ProSet® XT Range Hydro-pneumatic Blind Rivet Tools

The POP Avdel ProSet® XT tool line has many innovative high performance features including a patented "Quick Disconnect" nose housing and jaw case for rapid cleaning and maintenance of the front end without the need for any tools. The quick disconnect Mandrel Collection System (MCS) safely collects spent mandrels for quick, easy disposal and cleaner work areas. An air-isolation switch on the MCS prevents air flow when the MCS is disconnected. A left or right 90° swivel air fitting ensures the tools can be adapted to virtually any workstation configuration, while the "on/off" switch minimises air consumption and noise.

Features and Benefits

Performance

- High force-to-weight ratio
- Quick disconnect nose housing and jaw case for easy maintenance and service
- Clear quick release mandrel collector bottle reduces downtime
- Integral exhaust valves for fast setting cycles

Ergonomic

- Class-leading lightweight construction with balanced handling
- Comfortable, low activation force trigger
- Adjustable vacuum exhaust direction

Economy & Safety

- Air isolation switch during MCS removal
- On/Off, left or right swivel air fitting provides flexibility and conserves energy

Quick release Mandrel Collection System MCS

Quick disconnect nose housing and jaw case (without tools)

Power Tools

ProSet® XT1 - *The Lightweight*

Compact, lightweight and reliable pneumatic/hydraulic power tool, ideal for production line environments.

In its class the ProSet XT1 is among the highest force-to-weight ratio blind riveting tools in the industry. Innovative ergonomic design for maximum user efficiency and comfort.

Specifications

Weight, incl. nose equipment	1.15 kg
Weight, without nose equipment	1.05 kg
Pull force at 5.5 bar	6.5 kN
Force/Weight ratio	5.65 kN/kg
Stroke (min.)	18 mm
Cycle time (approximate)	0.4 sec
Air supply pressure (dry, filtered)	5.0 - 6.0 bar
Free air volume at 5.5 bar	1.5 l
Noise level	77.95 dB(A)

ProSet® XT2 - *The Flexible*

The ProSet XT2 tool sets new standards for pneumatic rivet tools. Designed specifically to set a wide range of breakstem rivets, this tool delivers 8.9 kN of pull force with an outstanding force-to-weight ratio of 7.18 kN/kg.

The robust tool rubber base is designed to avoid damage. Latest technology lip seals maximise re-priming intervals. Piston bearing rings ensure maximum robustness and tool life.

Specifications

Weight, incl. nose equipment	1.24 kg
Weight, without nose equipment	1.13 kg
Pull force at 5.5 bar	8.9 kN
Force/Weight ratio	7.18 kN/kg
Stroke (min.)	20 mm
Cycle time (approximate)	0.6 sec
Air supply pressure (dry, filtered)	5.0 - 6.0 bar
Free air volume at 5.5 bar	2.2 l
Noise level	77.1 dB(A)

Power Tools

ProSet® XT3 - *The High Performer*

The ProSet XT3 can be used in a variety of applications, setting a large range of breakstem rivets, lockbolts and sealing plug sizes. The extremely large stroke of 26 mm allows the placement of longer rivets like Monobolt and Interlock in one set.

Specifications

Weight, incl. nose equipment	2.14 kg
Weight, without nose equipment	2.0 kg
Pull force at 5.5 bar	17.0 kN
Force/Weight ratio	7.94 kN/kg
Stroke (min.)	26 mm
Cycle time (approximate)	0.9 sec
Air supply pressure (dry, filtered)	5.0 - 7.0 bar
Free air volume at 5.5 bar	6.3 l
Noise level	78.4 dB(A)

ProSet® XT4 - *The Power Pack*

The ProSet XT4 is the strongest tool of the ProSet family. With 23 kN the XT4 delivers the highest pull force in the range but weighs in at just about 2 kg. Beside structural breakstem rivets, the high capacity of the XT4 also allows to install Avdelok, Maxlok and Avtainer lockbolts. The tool features an ultra-high tensile piston rod for maximum tool life and a hydraulic damping for smooth operation.

Specifications

Weight, incl. nose equipment	2.16 kg
Weight, without nose equipment	2.0 kg
Pull force at 5.5 bar	23.0 kN
Force/Weight ratio	10.65 kN/kg
Stroke (min.)	18 mm
Cycle time (approximate)	1.0 sec
Air supply pressure (dry, filtered)	5.0 - 7.0 bar
Free air volume at 5.5 bar	6.3 l
Noise level	77.9 dB(A)

Power Tools

7287 Model

Hydro-pneumatic split tool with a lightweight placing head able to place Monobolt® and Interlock® structural blind rivets up to \varnothing 10 mm, as well as lockbolts and Avseal® sealing plugs.

Features and Benefits

- Hydro-pneumatic split tool
- Extended stroke and pull force
- Installation of large fasteners with single pull action, does not require second actuation (two pulls)
- Short cycle time can increase assembly capacity
- Lightweight placing head reduces operator fatigue
- Remote intensifier mounted on castors for flexible use in the assembly line
- 3 m hose length

Specifications

Pistol Weight	(without equipment)	1.47 kg
	(with equipment)	< 2.5 kg
Total weight	(without equipment)	40 kg
Pull Force @ 5.5 bar		32.4 kN
Stroke	min. under load	29 mm
	free cycling	32 mm
Cycle time (approx.)		1.7 sec
Air supply pressure		5.0 - 7.0 bar
Free air volume at 5.5 bar		3.5 l
Noise level		75 dB(A)

Power Tools

MCS5000

The MCS5000 remote vacuum rivet stem collector can hold up to 8500 spent stems increasing production line efficiency and promoting easy removal and recycling of scrap stems. The MCS5000 is compatible with all pneumatic POP Avdel tools. Adapter kits are required and sold separately (see below).

Specifications MCS5000

Weight	2.2kg
Length	414 mm
Diameter	356 mm
Air pressure	6.1 bar max.
Air consumption	317 litres/min
Max. tube length	4.5 m
Max. rise	1.8 m
Max. mandrel length	50 mm
Capacity	Up to 8500 spent stems

MCS5000 Adapter Kits

Tool	Adapter Kit Part No
ProSet® XT1	TRM00309
ProSet® XT2	TRM00310
ProSet® XT3	76003-20600 (*)
ProSet® XT4	76003-20600 (*)

(*) Additional kit (Part No 76003-20700) is required for 6.4 mm rivets.

Riveting Systems

Rivet Presenter

Rotary bowl rivet feeding system

Used in conjunction with our rivet tools the Rivet Presenter System offers single-handed, high-speed rivet feeding and setting. Automatic rivet stem collection of up to 8500 stems can be achieved by adding the MCS5000 remote stem collector.

Each time the front of the rivet tool is inserted into the receptacle at the front of the Rivet Presenter, a rivet is automatically and instantaneously loaded into the front of the tool. Rivets are stored in a rotary feeder bowl and continuously fed down a track into the receptacle ready for the next cycle.

Features and Benefits

- Feeder bowl capacity up to 1000 rivets
- Feeder bowl refilled in a few seconds
- Significant reductions in riveting cycle times possible
- Manual rivet feeding is eliminated enabling a white glove environment
- Single-handed operation leaves one hand free for other operations
- Enclosed feeder bowl and stem collection help keep working environment free from spilt rivets and stems
- For use with 3.2 mm - 4.8 mm rivets

Specifications

Model Number	For Rivet Diameter	Rivet Capacity
RP4-E	3.2 mm (1/8")	1000 Rivets
RP5-E	4.0 mm (5/32")	600 Rivets
RP6-E	4.8 mm (3/16")	400 Rivets
Height	337 mm	
Length	553 mm	
Width	223 mm	
Weight	10.5 kg	
Air pressure	4.8 - 6.1 bar, dry filtered	
Power supply	240 VAC, 50-60 Hz (0.25 Amp)	

Receptacle

Tool Series	Rivet Diameter [mm/(in)]		
	3.2 (1/8")	4.0 (5/32")	4.8 (3/16")
ProSet® XT1	RP4-486	RP5-486	RP6-486
ProSet® XT2	RP4-350	RP5-350	RP6-350
ProSet® XT3	RP4-501	RP5-501	RP6-501
ProSet® XT4	RP4-501	RP5-501	RP6-501

In addition to the RP unit you must order a receptacle specific to each ProSet tool. eg; to set a 3.2 mm rivet with ProSet XT1 order RP4-486 receptacle.

Riveting Systems

Vertical Riveting Tool HTB500

The breakstem rivet tool HTB 500 has been specifically designed for vertical down riveting. It is a hydraulically operated processing equipment for gentle and reliable rivet joints.

The pneumatic control and the pneumatic-hydraulic pressure intensifier, as well as the remote rivet stem collector are mounted in a separate supply unit. The trigger is integrated in the ergonomic handhold at the equipment barrel.

Features and Benefits

- Gentle and reliable rivet joints
- Simple positioning of the rivet equipment
- Quick and easy equipment handling
- Ergonomically handling for vertical processing positions
- Automatically shutdown of rivet stem aspiration

Specifications

Stroke	24 mm
Pull force	26 kN at 6.0 bar
Operating pressure	6.0 bar
Air consumption	5.7 l free air/ set at 5.5 bar
Hose length	3.0 m
Placing capability	Breakstem rivets \varnothing 3.2 - 6.5mm

Part-No. 78200-020058

Placing equipment has to be ordered separately.

The supply unit contains pressure intensifier, pneumatic control and rivet stem collector.

Riveting Systems

Customised Assembly Systems

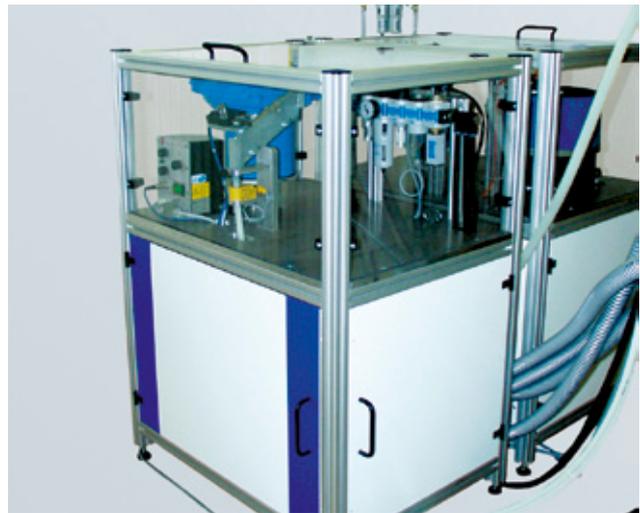

From simple twin-headed modules to multi-headed, customised equipment, these systems can dramatically reduce assembly time and costs while improving consistency of placing. These systems can be designed for virtually any application or assembly environment and process monitoring equipment or clamping modules can be easily integrated. The direction, type and number of assembly heads can all be customised. We have designed equipment with two heads to over eighty heads but the configurations are virtually limitless.

- High speed assembly
- Assembly of any configuration
- Fastening at any angle
- Synchronous fastener placement
- Highly controlled assembly
- Process flexibility
- Integration into assembly lines
- Improved product quality

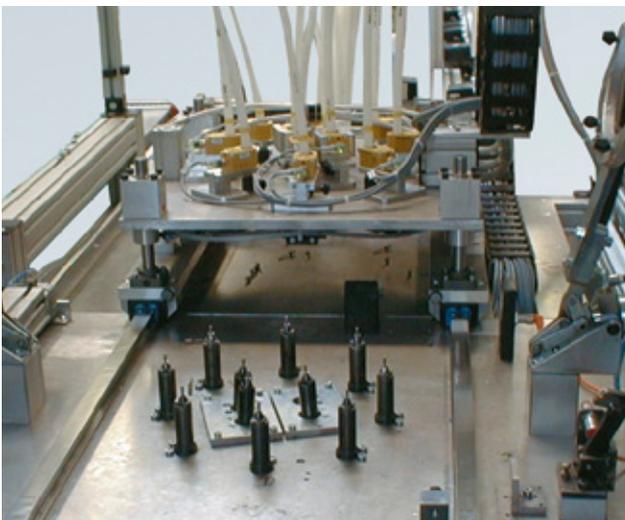

Assembly of any Configurations

Multi-head Assembly Station

Blow Feed Unit

12 rivets placed in one assembly cycle

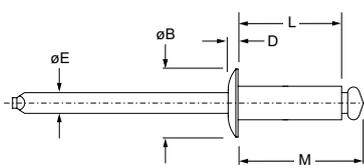

Fasteners are transferred from the bowl feeder to the placing head via the blow feeder

*: C1006-C1010

Rear sheet tail protrusion of installed fastener is application dependent - up to 0.4 mm is permissible.

Le dépassement en face arrière après pose dépend de l'application - possible jusqu'à 0,4 mm.

Der Bauteilüberstand des gesetzten Verbinders auf der Blindseite ist applikationsabhängig - bis zu 0,4 mm ist zulässig.

L'entità della sporgenza posteriore del rivetto installato è dipendente dall'applicazione. Fino a 0,4 mm è ammessa.

El remache una vez colocado, sobresale por la parte trasera de la chapa hasta un máximo de 0,4 mm permitidos.

Notes

POP® & Avdel® have been producing assembly systems since the 1930s and offer comprehensive ranges of innovative fasteners and installation systems to all market segments and applications. STANLEY Engineered Fastening offers POP Avdel products through Sales, Distribution and Manufacturing facilities in over 150 countries. Covered by the portfolio are:

Breakstem Riveting Systems
Various features from multi-grip capability to high strength stainless steel rivets.

Lockbolt Systems
High clamp force and vibration resistance for the highest strength joints.

Speed Fastening® Systems
Extra fast and reliable fastening from one side. Rivets are fed automatically.

Sealing Plugs
Engineered for both low-pressure and high-pressure hole sealing applications.

Blind Rivet Nuts
Fast system for sustainable threads with high torque-to-turn.

Customized Fastener Designs
Bespoke designs and finishes to meet your unique assembly requirements.

Installation Equipment
From manually operated power tools to customized semi and fully automated assembly workstations and repair tools.

We can also provide you with:

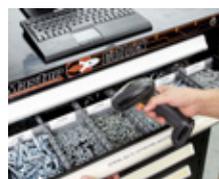

One-stop shopping for the blind riveting distributor market. MasterFix® owes its excellent reputation to the successful distribution of the broadest range of blind rivets and blind rivet nuts in the business.

CribMaster® is the global leader in inventory & asset management solutions for industrial environments.

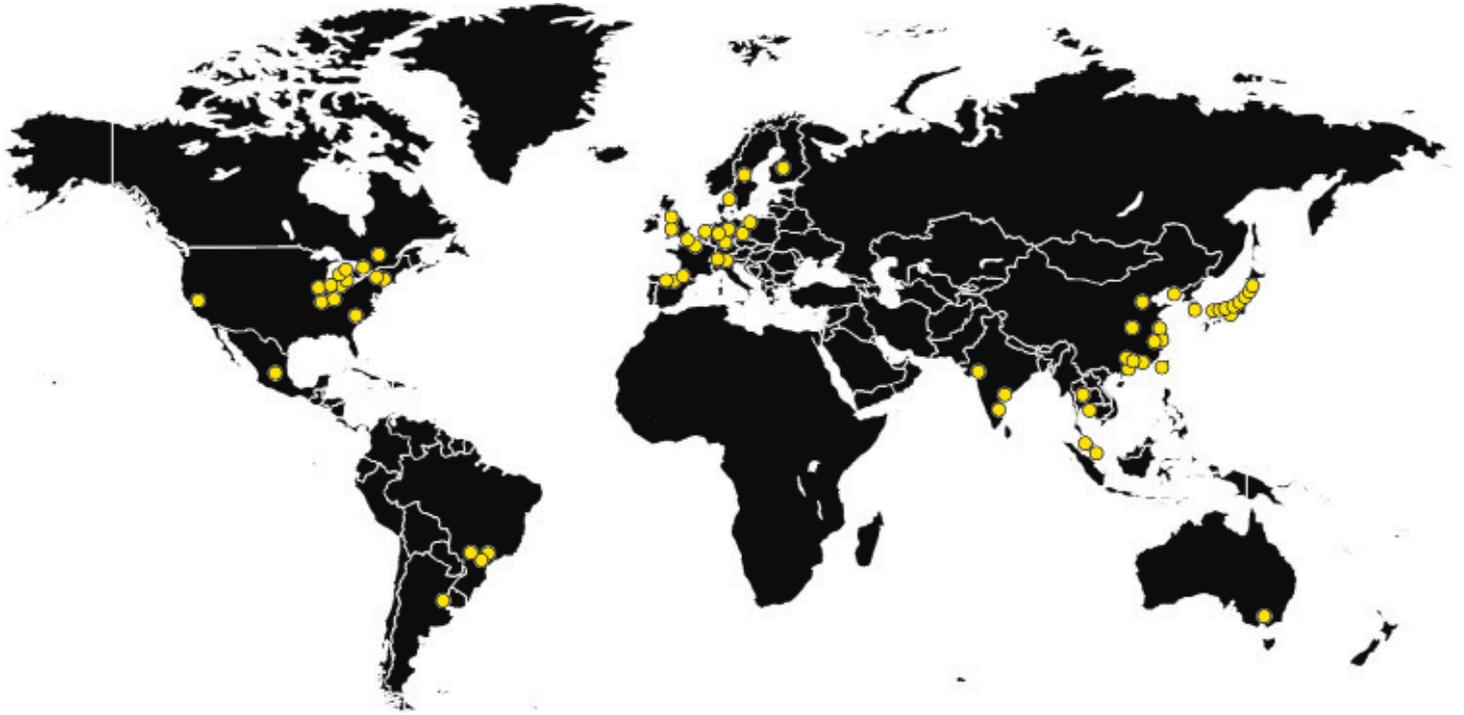

Spirallock® is a technologically superior fastening system ideally suited for threaded joint applications subjected to heavy shock and vibration.

CribMaster's comprehensive portfolio of vending machines & tool control solutions driven by a powerful software platform helps customers save 25% - 40% of costs associated with indirect material management, essential in the unrelenting drive towards efficiency & lower costs at manufacturing facilities today.

STANLEY®

Engineered Fastening

STANLEY Engineered Fastening, a Stanley Black & Decker Inc. Company has been revolutionizing fastening and assembly technologies for a variety of industries for more than 40 years.
